CrossEyes Product Description

CrossEyes Software Perpetual License is a time-saving add-in to Microsoft Word. It allows a Word user to view all of the formatting details of a document in one view. CrossEyes uses color-coded format codes to show how text is formatted as well as the location of images, textboxes, tables, etc. It makes it easy to edit the formatting of a Word document: when the user double-clicks on a format code in the CrossEyes display that they want to modify, the appropriate Word dialogue box appears. For more information, please visit our website at: <http://www.levitjames.com>.

Compatibility: CrossEyes is designed to work with the Microsoft Windows computer operating system and Microsoft Word word processor. CrossEyes can be used with Word 97 SR-1, or any later version of Word through Word 2003, that is installed on Windows 95, 98, 98 SE, NT-4, ME, 2000, or XP. CrossEyes does not function on any computer operating system other than Windows.

NOTE: CrossEyes License Pricing does not include a CD and Manual. A CD and Manual can be purchased separately (see below). The software is available for download on the Levit & James, Inc. website: <http://www.levitjames.com>. The license file will be emailed to the Customer.

A CrossEyes CD and Manual may be purchased separately for \$14.96. This package will be sent out by US Priority Mail on the same or following business day that the order is received. Shipment may also be expedited for an extra charge. Pricing for expedited shipping is shown on the price list.

Site Licenses for CrossEyes are available to government agencies or sites that 1) have more than 100 PCs with Microsoft Word, that 2) purchase a copy of CrossEyes for every PC in their agency, or at their site, which has a copy of Microsoft Word, and that 3) have a centralized help desk which will provide a single designated point of contact for Levit & James, Inc. technical support. Purchasing a site license entitles the Customer to additional discounts (see price list for details).
